

# Wheel Load Scale WL 108

**The next generation: wireless, battery life up to 180 hours, backlight display**

The new state-of-the-art wheel load scale from HAENNI: Certified to OIML R76 class 4. Easy to carry due to its light weight. Without need of ramps and connectors, it is ready for use at any time. Due to fieldbus interface and the wireless option, less or no cables are needed. A must have for demanding professionals.

<b>Application</b>	Measurement of wheel and axle loads of vehicles with pneumatic tires.
<b>Platform Size</b>	Standard size for accommodating easily a dual tire.
<b>Ranges</b>	0...2 t, 0...3 t, 0...10 t, 0...15 t
<b>Temp. range</b>	-20...+60 °C
<b>Accuracy</b>	OIML No. 76 Class 4, optionally with HAENNI works test report or intended for official test.
<b>Execution</b>	Aluminium alloys, water resistant IP 65 (IEC 144).
<b>Supply</b>	Integrated rechargeable power source, for 180 h operation. Recharge (and operation) by 12V car battery or AC adapter.
<b>In- and output</b>	Cable, Wireless
<b>Display</b>	LCD, 24 mm, graphic, with backlight
<b>Electrical connection</b>	Robust plug, watertight IEC 60130-10 5.5 mm / 2.1 mm
<b>Weight</b>	13.5 kg (0...2 t, 0...3 t) 16.5 kg (0...10 t, 0...15 t)
<b>Platform height</b>	19 mm (0...2 t, 0...3 t) 17 mm (0...10 t, 0...15 t)

### Operation

Due to its light weight, the wheel load scale WL 108 is easy to transport and can be used at any time without the need of ramps.

For efficient measurements it is recommended to work with at least two units. Measurements should be made on firm and level ground. The scale is placed close in front of the wheel to be tested and the vehicle is driven onto the platform. The wheel load is indicated directly on the digital liquid crystal display.

With a connecting cable or wireless, up to 12 scales can be used as an axle or total load scale. Up to 125 scales can be connected serially to a separate processing unit or to a personal computer.

### Accessories

For accessories as levelling mats, cables, pads for weighing point loads, carrying cases etc. refer to data sheet W9.100.

### Official Test

The wheel load scale WL 108 is tested and certified by OIML<sup>1)</sup> and by EC Type Approval.

1) OIML is the abbreviation for Organisation Internationale de Métrologie Légale.

2) In operation the complete surface may be used, because the ground pressure in the marginal area of the tyre foot print does not exceed 6 kg/cm<sup>2</sup>.

3) The smaller division should be chosen for specific applications only. In most applications the standard division is the better choice. Refer also to paper P 1196.

4) Minimum service hours without using optional wireless and backlight. Service hours with wireless: min 120h; Service hours with wireless and backlight: min 60h
